

Mapping your school

Leicestershire Orienteering club undertakes mapping of schools to ISSOM standards. We do this work in between preparing maps for our main events. It is not essential for a school to have a full orienteering map to provide an orienteering experience. The School Games format provides guidance.

Typical charges are £400 for a secondary school, £600 for a large secondary school /two schools on one site and £250 for a primary school.

Permanent Markers

The club also supplies permanent course markers, but you can make your own. Our advice is that these are optional for primary schools but should be used for secondary schools.

Markers need to be screwed on; preferably to wood. The locations chosen need to be spread around the campus. To fix the plaques to buildings the brick work will need to be drilled into. As the harder locations tend to be on the buildings we recommend these sites.

Our markers are 10cm square and have a vinyl identification number and a check letter.

A second check letter or symbol can be added and we can supply these.

Markers are £2.50 plus 25p for extra letters.

On the edge of playing fields it is usually necessary to erect permanent wooden posts to fix markers to. After allowing for delivery charges these cost about £10 each.

Access

For large secondary schools we like to use the school campus occasionally for a club competition. If you do not wish to be included in our programme, then please advise us.

Sites used for Club competitions

We have used Beauchamp Community College/ Gartree High, Guthlaxton College/ Abington High /Bushloe High, Charnwood College, Groby Community College/ Brookvale High, Ibstock College, Ivanhoe College, Judgemeadow Community College, Moat Community College, Soar Valley College and South Charnwood High. Also Leicester Grammar School, Loughborough Endowed Schools, Oakham School and Welbeck College. Such usage is sometimes arranged in conjunction with an event for students.

Contact

If you want to commission these services then we need advice on the area to be mapped, and any out of bound areas, eg nature reserve. We also need to know how many plaques you require.

Please contact Roger Edwards rwmhedwards@gmail.com or 0116 212 7547
