Comments

Many thanks to Vernon Davis who ran reception/start while I recovered from my exertions of setting the course out.

The movement of start venue was a success. Some people made approving comments which I think meant that it reduced their familiarity with area. The small car park was big enough for us and arranging for the toilets to remain open allowed them to be used for changing.

The weather was kind to us for most of the day, but after 8 o'clock there was a shower which dampened quite a few finishers. The finishing times suggest that most people found the courses adequate. I taped each control site with a 3-digit code intended as a defence against vandalism. The first 2 digits was the control number and the last one a secret number which I was able to check. Some people seem to have found it easier to use the tape rather than go to the plate.
