The short course was aborted on safety grounds due to flooding.

Planner's Comments

On the Sunday two days before the event conditions were appalling. Both the canal and the river had come over their banks and there was widespread deep flooding. Several controls sites on the pre printed maps were surrounded by water over a foot deep and the event itself was in doubt. On the day there was still considerable surface water and parts were too dangerous for the short course which had to be curtailed. Footing was treacherous in places and times reflect this. Many thanks to Roger Edwards, Roger & Chris Phillips, Bob Haskins and Peter Hornsby for assistance bring the controls in. Having spent 3 hours putting them out the prospect of retreiving them was daunting. We had a good turn out for another mid day midweek event.
