

Event Sub Committee Report. May 2018

1. Belvoir

In view of the comparatively small amount available to refund to competitors (approx. £500) the sub committee agreed, that whilst we would give competitors the option of a refund, we would have as a default position that the surplus would be split and donated to the three Midland Region Junior Squads. This seems to have met with a considerable degree of approval from those who would have taken part at Belvoir.

I will be happy to have a discussion at the meeting, if anybody so wishes, about the UKOL weekend in general or specifically about Belvoir.

2. Level C Events.

The next Level C is the Quorn Urban on 10th June 2018. The event centre will be Rawlins Academy. Both the planner and organiser were a little dismayed to discover just before Easter that the current map only covers half of the available area and there is no capacity to map the remaining part of the village. We will cope! Chris (as Organiser) would welcome volunteers to help.

There are three other events remaining in the 2018 programme. Shepshed 7th October, Bradgate 25th November, Martinshaw 30th December. Offers to plan, organise and control would be most welcome.

The draft 2019 programme has been submitted to the Regional Fixtures Secretary for approval.

3. Minor Fixtures.

The Summer League is well under way. (at the time of writing- 2 events complete, 17 to go) The usual presentation evening will take place after the final event. This year we will be barbecuing at the Black Horse at Aylestone. As we will be paying per head, pre-booking will be required. Indoor accommodation has also been booked should the weather turn inclement.

4. British Sprint Championships 2019. Loughborough University

Verbal agreement has been reached with the University regarding access and about a suitable location for the event centre.

The sub committee agreed that we should make contact with SI entries with regard to them handling entries, heat allocation and start times and finals allocation. They are performing this role for the 2018 Sprints/Middles weekend. Whilst this will be expensive (expected to be £4,000+) it will relieve a lot of pressure on club members and solve some problems in relation to handling data for the finals.

5. EMOA is planning a regional training day. Courses on offer will include, Controller, Organiser and Planner.
