B lost 15 mins, missing Norwegian controls

Planner's remarks

I (obviously) hadn't anticipated just how much time I was going to need!

Several people remarked that the new and accurate map was very welcome!

The out-of-bounds woods across the middle of the area led me to go for Norwegian for the Long and I sought to make courses that wouldn't encourage anyone to go through those woods.

It was difficult then, to make courses without repeating or dog-legging. In the event 5,6,7 on the Medium was tempting, as we were using punch-cards.

I'd never been to Fosse Meadows before May, and it is a delightful little park. Doing this event also led me to download and use OCAD.

I enjoyed immensely planning this event.

I owe a huge debt of thanks to Judith & John for maps, equipment, and moral support.

Also to Chris B and Mark F for baling me out on the day.
Very many thanks, and it was fun!
